

CORNING

B R A N D

DINNERWARE

(WITH GREEN OR MAROON BANDS)

LOOK AT THESE FEATURES:

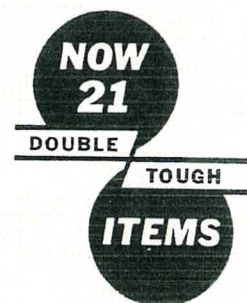

APPEARANCE: Gleaming white surface never grows dull. There is no surface glaze to wear away or scratch through. Sticky foods wash off smooth, hard surface easily . . . no deep scratches to hold dirt or grime. Attractively decorated with green or maroon bands.

DURABILITY: In drop tests, Double-Tough ware will survive from a height twice as great as other ware. Cup handles . . . an integral part of the cup . . . will not break off in use. Surface will not crack or craze from high temperatures in dishwashers, driers, or warming ovens. These dishes can be safely sterilized.

LIGHTER WEIGHT: Double-Tough ware is over 20% lighter in weight than competitive institutional dinnerware — trays of stacked dishes are easier to carry and handle.

Use CORNING *double-tough* Tumblers

—Cut Glass Breakage in Half!

SCIENTIFIC TESTS by York Research Foundation prove that CORNING Double-Tough Tumblers last up to 4.3 times longer in hotel and restaurant use than ordinary tumblers because of Corning's special tempering process! The rims are *unusually* chip-resistant. Any tumbler which chips on the rim will be replaced free of charge.

SPARKLING, CRYSTAL-CLEAR Double-Tough Tumblers are thin, yet sturdy—as eye-appealing as they are durable! They come in four graceful shapes: Bell, Bulge, Straight and Pilsener.
