**I**ROQUOIS VITRIFIED CHINA combines uniform quality and color, a complete line of shapes, attractive designs and practical construction to a degree that fully justifies its ready acceptance.

The finest grades of selected materials are used in the manufacture of Iroquois Vitrified China. The hard glaze does not penetrate into the bisque body but rather unites with it, forming a permanent inseparable unit of great tensile strength. This glaze protects the design and surface of the ware, assuring long service without discoloration.

Our wide variety of stock patterns, ranging from those of modern trend to early American styles, will meet all requirements.
