**D. E. McNICOL POTTERY COMPANY**  
*Clarksburg, West Virginia*

COPYRIGHT, 1951  
D. E. McNICOL POTTERY COMPANY  
CLARKSBURG, WEST VIRGINIA

## SINCE 1874

THE McNICOL POTTERY COMPANY, one of the pioneer potteries in America, was founded by Mr. D. E. McNicol, Sr., in East Liverpool, Ohio, in 1874. The pottery was moved to Clarksburg, West Virginia in 1914, and descendants of the founder have continued the operation of the Company and it is now under McNicol management in the third generation.

McNicol has paced the industry in the most modern methods of manufacturing fine China. Perfection in McNicol ware is assured not only by the best of materials and the most modern of vitrified china plants, but also by artistic and technical inspection at each step in the manufacturing process. The leadership of McNicol China is due to the exacting standards by which it is made. All factors relating to appearance, purity of body, potting care, uniformity, glaze brilliance, and the artistry of the decorations are a McNicol achievement.

For many years the McNicol Pottery Company has been devoting all its facilities to the manufacture of Vitrified China exclusively. During this time McNicol China has become well known in all states of the Union, and it also has wide distribution in several foreign countries.

The high quality of McNicol ware, established long before the turn of the century, has become a tradition maintained throughout the later years to bring to America's leading hotels, restaurants and dining establishments the combination of rare beauty and serviceability for which McNicol Vitrified China is famous.

In public dining services everywhere the first impression of cordial welcome is created by attractive table appointments. For many years McNicol has been manufacturing Vitrified China of outstanding design, exquisite taste and incomparable value. China must be well chosen to reflect the prestige of your establishment and the quality of your service. From the standpoint of catering to the public, therefore, china that will wear well and be long lasting is essential. The high quality and type of McNicol designs are keyed to American tastes.

McNicol makes Vitrified China for America's finest dining establishments. It is designed to meet the most exacting standards in weight, thickness, finish, and elegance of pattern. McNicol China is as practical as it is beautiful. It is designed to take rough punishment. Because of the durable strength of its body, McNicol China will stand up long after less carefully made ware is cracked, chipped, or destroyed by the rigors of commercial use.

The beauty of McNicol patterns is preserved indefinitely by the tough permanent glaze and they will not fade or craze. The glaze of high fired McNicol China is extremely hard, and is not easily scratched with cutlery. Because it is non-porous and non-absorptive it will not become discolored by foods. It is important to consider the heat retaining capacity of McNicol Vitrified China in the good service of food.

McNicol Vitrified China is styled with consideration to shapes in relation to intended use. Requirements of all establishments are met with China designed to fit table space. McNicol has kept pace with the designs of furniture, fixtures of all kinds, drapery textures, floor coverings, metal, lighting effects, architectural principles, and modern color arrangements. For complete harmony with any color decoration, McNicol has created China patterns which are the ultimate in smart design. The cost of China is determined by its total usable life and not by initial cost. In this respect the use of McNicol Vitrified China is most economical. The qualities of long life and built-in serviceability of McNicol Vitrified China will save you money.

The McNicol Pottery Company cordially invites you to call upon them for any information you may require for the equipment of your establishment with flawless table appointments of superb excellence.
